Overview

ILLUXTRON®

REWARDING BRIGHTNESS

At Illuxtron International we research and manufacture inventive lighting solutions, which offer as much comfort and ease as possible, all without damaging the environment on a day to day basis. After many years of experience in product development our results show in a range of completely self-developed, high-end luminaires.

About Illuxtron International

During production we only use high quality materials and we test our products extensively. We pay attention to every detail. Therefore, we are able to offer our clients products that seamlessly meet and often exceed their expectations. As production takes place in the Netherlands, we are also able to monitor the production process closely. This means we are able to guarantee the highest level of quality, and as a result, we offer a 7 year warranty. Each individual department in our company works closely together, allowing us to achieve a shorter delivery period than our competitors.

Customer satisfaction and flexibility are our top priorities. We help our clients find suitable lighting solutions and adjust our offers where needed. Long term relationships with our clients is what we strive for. This results in a straightforward way of doing business. Integrity, professionalism and knowledge are the reasons you can rely on our service. All of the above makes Illuxtron International distinctively different from our competitors.

Illuxtron International wants to reward you with brightness, by bringing new perspectives to light: today, tomorrow and beyond.
